

COVID-19 TESTING

Priority Laboratories (PL) is excited to announce the launching of their COVID-19/SARS 2 testing program. This state-of-the-art testing program utilizes Polymerase Chain Reaction (PCR), offering the most sensitive and precise results available in the infectious disease space. PCR is the gold standard for all infectious disease testing which Priority Laboratories has been employing for years in its infectious disease programs. PCR identifies the pathogen genetically by the detection and amplification the RNA of virus COVID 19. At a time when false positives and negatives can mean the difference in infecting a loved one or not, the experience that Priority Laboratories has in the infectious disease space is invaluable.

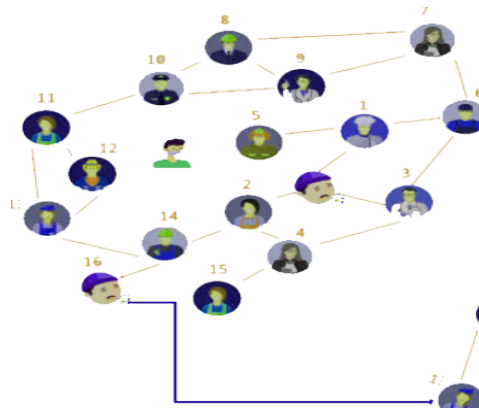

WHY TEST WITH US?:

2-3 Day Turnaround Time

We work directly with THERMO FISHER giving us access to some of the most qualified scientists in the world

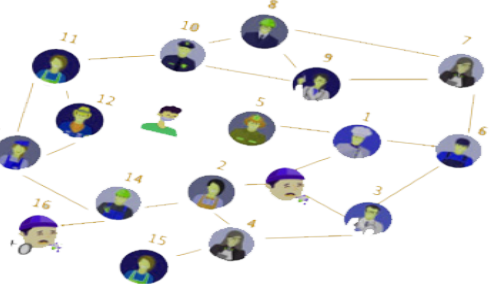

Fully automated extraction process which eliminates human error

HOW MUCH DOES COVID-19 CIRCULATE AROUND US?

According to this research, the virus may be around

15% of the participants say, 'There's someone around me (his/her family, friend, worker, boss, grocery store, neighbor, or anyone else he's/she's in contact with) infected by Covid-19.'

Ministry of Health says:

Every 1 person contaminated exposes Covid-19 to an average of 16 people

***Study performed by Perlego marketing research**
